1. Claims 1-7 and 9-14 are again rejected under 35 U.S.C. 103(a) as being unpatentable over applicants' statement of the prior art for the reasons of record.

The three Japanese patents that exemplify applicants' statement of the prior art all disclose intermediate layers containing hollow particles having the same particle size range as claimed by applicants. The experimental modification of this prior art in order to ascertain optimum operating conditions (e.g., determine the size of the hollow particles employed) fails to render applicants' claims patentable in the absence of unexpected results. To date, such evidence has not been submitted.

2. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
